SUMMARY

Backend Software Engineer with a Master's in Computer Science, experienced in building RESTful APIs, full-stack web applications, and AI-integrated systems. Proficient in Python (Django, Flask, FastAPI), Java (Spring Boot), TypeScript, and PostgreSQL. Thesis research focused on applying Large Language Models to Natural Language Processing and Text-to-SQL translation. Im looking to start as a Backend Developer and related roles.

EDUCATION

University of Verona

Verona, Italy

Master in Computer Science and Engineering (105/110)

Oct. 2022 – Oct. 2025

- **Thesis:** *Using LLMs to Translate Natural Language into SQL Queries* — evaluated and compared multiple LLMs (SQLCoder, GPTs, Gemini, Claude) on their ability to generate accurate SQL from natural language, analysing trade-offs in accuracy, latency, and cost across model families.

University of Verona

Verona, Italy

Bachelor in Computer Science

Oct. 2019 – Oct. 2022

- **Thesis:** *Health monitoring and activity suggestion system using Fitbit data and the Apriori algorithm, built with the Ionic Vue framework.*

EXPERIENCE

IT Support Specialist

Sept. 2024 – Oct. 2025

Generali Italia: Banca e Assicurazioni (Full-time, alongside M.Sc. studies)

Verona, Italy

- Provided technical assistance to employees by troubleshooting hardware, software, and network issues, ensuring minimal downtime and smooth daily operations.

Software Developer – Internship

Jan. 2024 – May 2024

BSQ Security

Verona, Italy

- Built a RESTful API using Flask for an AI-powered CCTV alarm detection system, enabling seamless integration with front-end clients and external services.
- Developed a Telegram bot to deliver automated alarm notifications to subscribed users, integrated with the backend API.
- Debugged and performed unit testing of the web application qboard.app using pytest, ensuring functional reliability before release.
- Authored technical documentation to ensure reliability and maintainability of developed components.

Vue Developer – Internship

Dec. 2022 – Apr. 2023

RealT

Verona, Italy

- Developed a web application using Vue.js, TypeScript, Tailwind CSS, and Docker.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, SQL (PostgreSQL), JavaScript, TypeScript

Frameworks: Spring Boot, Django, Flask, FastAPI, Node.js, JUnit, Angular, Vue.js, TailwindCSS

Developer Tools: Git, Docker, VS Code, IntelliJ, Linux, Postman

Libraries: pandas, NumPy, Matplotlib, Transformers, PyTorch, Scikit-learn

Languages: Albanian (Native), English (Fluent) C1-C2, Italian (Fluent) C1-C2

PERSONAL PROJECTS

Store Inventory Management System | *Python, Django, Angular, PostgreSQL, Docker* March 2025 – Present

- Developed a full-stack web application with a Django backend, PostgreSQL database, and Angular frontend to manage inventory, sales, and restocking for a retail fish store.
- Deployed and hosted the application using Docker containers; currently in active use by the store owner.

Hospitium | *Java, Spring Boot, Gradle, H2*

Jul. 2024

- Developed a software system to manage the operations of a medical clinic, supporting doctors and nurses in handling medications and blood test workflows.
- Implemented a shared secretarial interface for managing appointments and patient records.

Vue Job Search | *TypeScript, Vue.js, Django, PostgreSQL, REST API*

Sept. 2022

- Developed a job search platform allowing users to filter listings by location, job type, and keywords.
- Implemented user authentication and profile management features.
